PICK-UP TRUCK RACKS

Contractor Rig®

Our Contractor Rig® is the undisputed leader among contractor ladder racks. Its heavy wall, large profile aluminum extrusions provide outstanding performance in high abuse environments. A removable rear crossmember with adjustable handles, Ladder Life® anti-wear inserts on each crossmember, Ladder Glide® low friction insert on rear crossmember, and choice of color inserts is included. The Heavy (I.T.S.®) Series has a 1250 lb. capacity and the Standard Series has a 1000 lb. capacity.

Standard.....	1154.00

Utility Rig™

Our Utility Rig™ is a versatile and economical rack with almost all the virtues of the above system. This configuration is widely used by cable TV, phone companies and contractors who carry mostly rigid overhead cargo, i.e. ladders, large dimension lumber, etc. Its extremely rigid free standing trusses have a 600 lb. capacity. The rear truss is completely removable in seconds. The Utility Rig™ includes Ladder Life® anti wear inserts on each crossmember, Ladder Glide® low friction insert on rear crossmember, side stops on all four upper corners, and choice of color inserts is included.

All Pick-Ups

All Mini Pick-Ups with long and short beds, std. and ext. cabs.....	1468.00

UTILITY BODY RACKS

Contractor Rig®

The Contractor Rig is the ideal rack for utility body trucks. The Utility Trak (for surface mount) and the Pick-up Trak (for inside corner mount) allow System One racks to be mounted to both conventional and top-opening lid body types. Two or three trusses in Standard or Heavy I.T.S. Series can be used. The rear crossmember is removable and comes with our Ladder Glide low friction insert. All crossmembers include our Ladder Life anti-wear inserts. Choice of color inserts is included. The Heavy I.T.S. Series has a 1250 lb. capacity and the Standard has a 1000 lb. capacity. Specify distance from top of body to top of cab roof.

	Standard Series.....	1314.00
Additional Truss.....	I.T.S. Series.....	\$275.00 Std. Series.....\$260.00

Utility Rig™

The Utility Rig mounts rigidly to either our Utility Trak or our Pick-up Trak and can be used on both conventional and top-opening lid body types. Two or three trusses are easily mounted and dismounted and can be placed anywhere along the length of the Trak. The Utility Rig comes with Ladder Life anti-wear inserts on each crossmember, Ladder Glide low friction insert on rear crossmember, side stops on all four upper corners, and choice of color inserts is included. Capacity is 300 lbs. per truss. Specify distance between top of body and top of cab roof.

Heavy Work Contractor Package - Save \$99 !

This is the most common outfit bought by utility body owners. The Heavy Work Contractor Package includes the Heavy I.T.S. Series Contractor Rig and 4 Work Winches with handles. Separately, the Work Winches total \$398.00. This Heavy Work Package gives you 4 Work Winches for \$299.00, saving \$99.00

All Heavy I.T.S. Series Contractor Rigs priced above.....add \$299.00

Save \$99!

VAN RACKS

Contractor Rig®

All aluminum and stainless steel, the van Contractor Rig is absolutely the most practical rack available anywhere for a van. All crossmembers have a high density polyethylene Ladder Glide insert so cargo slides on and off with ease. The rear crossmember is cantilevered back so that ladders and lumber don't scratch or dent the roof while loading and unloading. The rack utilizes I.T.S. Series brackets and is ready to accept Work Winches. 800 lb. capacity, choice of color inserts is included.

All Full Size Vans standard length.....	\$924.00
All Full Size Vans extended length.....	944.00

Utility Rig™

The Utility Rig for vans is a simple design and features all aluminum and stainless steel construction. They are available in 2 or 3 truss versions and each crossmember includes a high density polyethylene Ladder Glide insert for low friction loading and unloading of cargo. T-slots in the crossmembers allow accessories to be positioned almost anywhere. The I.T.S. Series brackets accept Work Winches and make securing of loads quick and easy. 200 lb. capacity per truss.

All Full Size Vans 2 trusses (crossmembers).....	\$385.00
All Full Size Vans 3 trusses (crossmembers).....	605.00

Heavy Work Contractor Package (Includes 4 Work Winches®)

The Heavy Work Package for vans combines the Contractor Rig with 4 Work Winches making this the best and most efficient cargo carrying system made for vans.

All Full Size Vans standard length.....	\$1223.00
All Full Size Vans extended length.....	1243.00

ENCLOSED BODY RACKS

Contractor Rig®

Our Contractor Rigs for enclosed bodies utilize our Surface-mount I.T.S. Brackets. They can be installed on Utility Traks for extra rigidity and weight distribution or they can be installed without Utility Traks provided the roof structure will support the brackets directly. In all cases, the body itself must be strong enough to support the rack and any anticipated cargo. Choose one of the lengths listed below and specify the overall width desired from outside to outside of supports. There are 5 crossmembers on a typical Contractor Rig. Additional supports or crossmembers can be ordered.

Extension Beam Length	Outside distance of brackets				
	up to 56.5"	56.75" to 66.5"	66.75" to 76"*	76.25" to 86"*	86.25" to 96"*
102" and 120"	\$890.00	\$920.00	\$990.00	\$1050.00	\$1130.00
138"	900.00	930.00	1000.00	1060.00	1140.00
147" and 156"	920.00	950.00	1020.00	1080.00	1160.00
174"	970.00	1000.00	1070.00	1130.00	1210.00

*Stiffening ribs may be desirable on these longer crossmembers - see accessory list

Additional pair of supports.....\$ 70.00

Utility Rig™

Utility Rigs for enclosed bodies should be mounted on Utility Traks unless the roof surface is very rigid. The truck body must be strong enough to support the rack and any anticipated cargo. Any number of trusses are available, and all use I.T.S. Surface-mount Brackets. Specify the overall width desired from outside of bracket to outside of bracket and number of trusses needed.

Number of Trusses (crossmembers)	Outside distance of brackets				
	up to 56.5"	56.75" to 66.5"	66.75" to 76"*	76.25" to 86"*	86.25" to 96"*
2 trusses	\$375.00	\$385.00	\$415.00	\$450.00	\$480.00
3 trusses	562.50	577.50	622.50	675.00	720.00
4 trusses	750.00	770.00	830.00	900.00	960.00

*Stiffening ribs may be desirable on these longer crossmembers - see accessory list

Utility Trak

It is recommended that all racks be mounted on Utility Traks for maximum strength and fewer roof penetrations. Utility Traks have a concealed T-slot underneath allowing standard carriage bolts to secure the Trak to the roof. A T-slot in the upper surface is used to mount the rack. The Trak also has an anchor rail with 7/8" diameter holes located 12" apart for tie-downs. Sold in pairs. High Density foam tape is available - see accessory list.

96".....	\$205.00
106.75".....	235.00
132".....	285.00
156".....	320.00

Heavy Work Contractor Package

Save \$99!

Build Your Own Interior

Dividers

Dividers attach to the rear mounting rails on the back wall of the tool box interior. They are made from .100" 5052 aluminum alloy. Included are 2 stainless steel carriage bolts, nuts and lock washers.

Divider..... \$25.00 ea.

Lower Shelf

The lower shelf works in either of the three lower holes in a divider. It is made from .100" 5052 aluminum alloy and is supplied with 2 shelf brackets and 8 stainless steel carriage bolts, nuts and lock washers. These shelves are 12" wide and come in various lengths for a perfect fit in the various lengths tool boxes available.

Lower Shelf..... \$70.00 ea.

Upper Shelf

The Upper Shelf mounts in any of the 7 sets of divider holes. It is made from .100" 5052 aluminum alloy and is supplied with 2 shelf brackets and 8 stainless steel carriage bolts, nuts and lock washers. These shelves are 10-5/8" wide and come in various lengths for a perfect fit in the various lengths tool boxes available.

Upper Shelf..... \$70.00 ea.

Shelf Bracket

Shelf brackets are available individually and are useful when a complete shelf is not used. They may be used to support a single polypropylene bin above a particular compartment or tool, or may be used to support a box containing a tool or parts. Shelf Brackets are constructed from .100" 5052 aluminum alloy and are supplied with 2 stainless steel carriage bolts, nuts and lock washers.

Shelf Bracket..... \$9.50 ea.

Bins

Polypropylene Bins are available in six sizes, color is yellow. See the chart on page 10 to determine bin quantities that will fit in your particular tool box.

Size 1 5-3/8"D, 4-1/8"W, 3"H* - usually used as a pair in the center behind the latch housing on the third level \$5.00 ea.

Size 2 7-3/8"D, 4-1/8"W, 3"H* - usually used on the third level anywhere except behind the center latch housing..... \$6.15 ea.

Size 3 10-7/8"D, 4-1/8"W, 4"H - used on a wide lower shelf or on the floor of the box..... \$9.05 ea.

Size 4 10-7/8"D, 5-1/2"W, 5"H* - used on a wide lower shelf or on the floor of the box..... \$13.40 ea.

Size 5 10-7/8"D, 11"W, 5"H* - used on a wide lower shelf or on the floor of the box..... \$16.95 ea.

Size 6 10-3/4"D, 8-1/4"W, 7"H - used on the floor of the box, also fits perfectly between 2 full length shelves behind the center latch..... \$18.40 ea.

*clear acrylic lid available
